

# Jussi Kinnunen

Lead Consultant, Technology

## Introduction

Lead full-stack consultant with long hands-on experience in building and modernizing business-critical systems - including cloud backends for connected device fleets, from content distribution to sensor telemetry. Strong delivery focus across backend, cloud, integrations, and practical architecture. Hardware is also a hobby: I design, prototype and run my own home automation and embedded projects.

## Basic Data

**Domicile:** Siuntio

**Year Of Birth:** 1977

**Marital Status:** Married, no kids

**Working Languages:** English, Finnish

**Linkedin:** <https://www.linkedin.com/in/jussi-kinnunen-99b109/>

## Work Experience

### Lead Consultant, Technology

Wunderdog Oy

3.4.2022 - present

### Senior Software Developer

Tulka Oy

1.2.2020 - 29.3.2022

### Senior Consultant

Amban Nordic Oy

15.10.2018 - 28.1.2020

### Senior Software Developer

Quattrofolia Oy

27.3.2017 - 1.10.2018

### Senior Software Developer

Opr-Vakuus Oy

13.8.2015 - 22.3.2017

### Cloud Developer

Posterfy Oy

1.4.2014 - 21.6.2015

### Developer

Nice Business Solutions Oy

1.10.2009 - 5.4.2014

### Developer

Elma Electronic Trading -> integrated into -> Itella Information Oy

13.3.2006 - 30.9.2009

### Systems designer

IntStream Oy

1.10.2000 - 30.2.2006

### Software developer

Nobman Informatics Oy

1.9.1999 - 31.9.2000

## Case Files

### Posterfy - Connected fleet of low-energy e-paper devices

Digital signage startup, 5 people

Cloud Developer, sole owner of the backend

2014 - 2015

- Sole responsibility for the design, implementation and maintenance of the cloud backend serving the device fleet
- Distributed display content to low-energy e-paper devices deployed in the field
- Ingested sensor telemetry from the devices, processed it and reacted to it automatically

- Startup closed after it was unable to raise follow-on funding

## **Veikkaus - Point-of-sale environment for lottery and betting**

Coupon-based lottery and betting games; Electron client with Kotlin/Spring backends

Lead Consultant, Technology

2022 - present

- Built user interfaces and backend integrations for the new Milli product
- Integrated a new user identification system and developed the user interfaces for it
- Root cause analysis of production problems
- Infrastructure development with Terraform and deployment management
- Shared DevOps duty across the team - taking turns releasing to production and developing the pipelines and infrastructure

## **Technology Expertise**

- Core languages and runtime
  - JavaScript
  - TypeScript
  - Node.js
  - Java
  - Python
  - Kotlin
  - C
  - PHP
  - Perl
  - Scala
- Backend and API architecture
  - Spring
  - Spring Boot
  - OAuth 2.0
  - OAuth/OIDC
  - API development
  - Software architecture
  - System integration
- Frontend and mobile
  - React
  - React Native
  - Angular
  - Redux Thunk
  - Electron
  - Interface design
- Cloud platforms
  - Amazon Web Services (AWS)
  - Google Cloud Platform (GCP)
  - AWS Lambda
  - AWS ECS
  - AWS Secrets Manager
  - RDS
  - ElastiCache
- Containers and Kubernetes
  - Docker
  - Kubernetes
  - Google Kubernetes Engine (GKE)
  - Azure Kubernetes Service (AKS)
- DevOps and automation
  - GitLab CI
  - Jenkins
  - Atlassian Bamboo
  - Ansible
  - Terraform
  - Build automation
  - Deployment automation

- AI-assisted development
  - Agentic coding workflows
  - OpenCode
  - IntelliJ Junie
- Databases and data platforms
  - PostgreSQL
  - MySQL
  - Oracle
  - Microsoft SQL Server
  - IBM DB2
  - InfluxDB
  - Redis
  - FedoraDS
  - LDAP
  - Influx DB
- Integration and enterprise technologies
  - XML
  - XSLT
  - Sonic ESB
  - Software development lifecycle
  - Scrum
- Domain expertise
  - Gaming industry
  - Insurance industry
  - Credit products
  - Energy trade
  - Healthcare
  - Digital Signage
  - Edifact interchange
- Operating systems and infrastructure
  - Linux
  - AIX
  - Virtual servers
  - Virtual networks
  - Nginx

## Hobbies and Other Interests

- Photography
  - Analog and digital photography, development, post production
- Boardsports
  - Trampa, Snowbarding
- Electronics
  - Arduino, MSP430, hacking, Node-RED, Raspberry Pi, circuit desing, prototyping, RP2040, RP2350
- Crafting
  - 3D printing, Laser cutting, Cad Modelling
- Literature
  - Philip K. Dick (<http://philipkdick.com/>)
  - Ken MacLeod
  - Terry Pratchett (<http://www.ie.lspace.org/>)
  - Lovecraft
  - Robert Ervin Howard
  - History, popular science
- Coding
  - GitHub repositories: <https://github.com/jussikin/>
- Homeautomation
  - greenhouse automation, energy harvesting, monitoring, various home displays
